updates from the updater process, because we noticed a few issues in how the updater communicated to the Windows Update server. Some users reported having issues after downloading the update, and we wanted to address that. Since this Beta release, we have fixed the issue, and we are now starting the rollout of the fix through the Windows Update service. We have received feedback that some users are still seeing issues after installing Malwarebytes Anti-Malware Premium Beta. If you run into the following issues, please try the following steps: Solution 1 - Re-install the Update Step 1 - Please ensure that Windows Update is not set to automatically install updates. Step 2 - When prompted, select to install updates from this list: - Microsoft Update - Add/Remove Programs - Windows Defender Step 3 - Click OK Step 4 - Click the arrow next to Start, then select All Programs > Accessories > Command Prompt Step 5 - In the command prompt window, type "msiexec /a file:C:\Windows\System32\WindowsPolicies.msi /qb" without the quotes and then hit Enter. Step 6 - The command prompt will close and you will be prompted to install Windows Defender. Click Yes. 82157476af
