

---

It's Independence Day! One of the world's most celebrated days in which people celebrate the freedom to choose their own government, independent from any other country. What better way to show our appreciation than by watching one of the best films about this much-beloved holiday? This Hindi dubbed version is in English and its quality is superb. The actors are competent, and they manage to deliver an excellent performance. Of course, if you prefer your film in Hindi...well...I think you know what to do. It's hard not to love Independence Day: Resurgence when it's full of life, happiness, and hope for all people everywhere. Independence Day 2: Resurgence is an action film directed by Roland Emmerich. The film shows humanity's fight for freedom against an alien invasion on the Fourth of July, the same day when mankind declared independence from England in 1776. The aliens are back stronger than ever. When they first attacked Earth in 1996, they were pushed back by our valiant heroes, but now they're coming back to finish what they started. That's right, Independence Day 2 is a movie about the United States fighting to become independent once again, only this time it could actually be for real! This Hindi dubbed version was released on 9 December 2017 in India and received positive reviews from critics and audience alike. As of today, the film has 3.7 stars on IMDB and is being called a strong follow-up to the original Independence Day. The story of Independence Day Resurgence is a more direct sequel to the original Independence Day. In the first film, a giant alien mothership appeared over New York City and rained down massive amounts of destructive radiation that nearly eradicated humanity from Earth. In this film, however, it wasn't aliens that came back to Earth--it was humans themselves! A group of intergalactic human refugees decided to come back to Earth for one purpose: revenge. They wanted to destroy humanity in one powerful blast, just like the aliens did in the first film. They wanted to show humanity that they would not be able to push them out again, and that they should heed the warnings of their past. So, when this intergalactic human colony arrived on Earth, it looked as if our planet was doomed for sure... but wait! Humanity wasn't going to take this alien threat lying down. Instead of surrendering, mankind decided to fight back against this alien threat. They wanted to show the human colony that they could still fight and win! Yes, it's Independence Day: Resurgence. And this year's Independence Day is going to be the best one yet. A better sequel, in fact! It has better special effects, more action-packed fight scenes, and an overall dramatic plot with plenty of suspense and tension. If you're a fan of Independence Day like I am, then you'll love this movie! And if you're not a fan of Independence Day, I think you'll still like this movie anyway because we all love movies! If you haven't seen Independence Day: Resurgence yet or any of Roland Emmerich's films in general...well...
